THE BIG BATTLE

General Foch Says Offensive Is Necessary for Victory.

SURPRISE, MASS AND SPEED

Final Attack With These Characteristics, by Troops Carefully Prepared and Then Thrown in Without Regard to Losses.

London.-Battles can be won in the end only by the army which takes the offensive. This is the significant declaration made by General Foch, commander in chief of the allies, in an article contributed by him to the weekly journal, the Field, in which he discusses the problem of the soldier and the way to victory.

"Modern warfare, to arrive at Its end and to impose its will on the enemy," General Foch says, "recognizes only one means-destruction of the enemy's organized forces.

"War undertakes and prepares this destruction by battle, which brings about the overthrow of the adversary. disorganizes his command, destroys his WORLDWIDE SUFFRAGE discipline, and nullifies his units as far as their fighting power is con-

> No Victory in Defense. "Our first axiom must be that to achieve its object a battle must not be purely defensive. A purely defensive battle, even well conducted, does not result in a victor and a vanquished. It

"From this it is an obvious corollary Pathway of 26 Nations Striving For that an offensive, whether started at the beginning of an action or whether it follows the defensive, can only give results, and, in consequence, must al-

ways be adopted at the finish. "To maintain our position is not synonymous with being victorious and even prepares for a defeat. If we retack, to guard against the plans of the enemy, and prevent him from carrying out the same maneuver, we must undertake to carry on and sustain numerous combats, each with determined

All Depends on Reserve.

"But since there remains no doubt that decisive attack is the very keystone of a battle, all other actions which make up a battle must be envisaged, considered, organized, provided with forces in the measure in which they will prepare, facilitate, and guarantee development of a decisive attack characterized by its mass, its surprise, its speed, and for which, in consequence, it is essential that there shall be the maximum reserve force possible of troops of maneuver.

"The reserve—that is to say, prepared bludgeon-is organized and the single act of battle from which results are expected-namely, the deeisive attack.

Surprise, Mass and Speed. "Reserves must be husbanded with the most extreme parsimony so that the bludgeon may be strong enough to tude to them should be acknowledged make the blow as violent as possible. Let loose at the finish, without any ment they ask is their admission to lurking idea of saving them, with a the suffrage. Can we justly refuse it? well thought out plan for winning the "As for America it is my earnest battle at a point chosen and deter hope that the Senate of the United mined, reserves are thrown in all together in an action surpassing in vio lence and energy all other phases of battle, an action with proper characteristics surprise mass and speed All our forces really participate, either

by preparing it or by carrying it out. "In this, our supreme aim, we must not be deceived by appearances. Although theory fails when applied by feeble hands and when accessories obscure the main principle, history and reason show us that in battle there is a single argument which is worth while -namely, decisive attack, which is alone capable of assuring the desired

GIVEN HONOR NOT DESERVED

Error of Learned Men Responsible for America Being Named After Amerigo Vespucci.

The story of how the new world received the name of America is a striking example of what publicity will accomplish. Amerigo Vespucci, a highly educated Florentine, was head of a business house in Seville, Spain, probably as agent for the great trading firm of the Medicis, and helped to fit out one of the expeditions with which Columbus sailed. When the latter's monopoly was revoked, Vespucci undertook several voyages of exploration on his own account, during which he claimed in many letters to have been the first to reach the mainland of the new continent, giving the date as June, 16, 1497.

On April 25, 1507, the learned heads of the University of St. Die, in Lorraine, decided, incorrectly, that he was entitled to the honor of discovery, Columbus having only reached the islands of the West Indies, and that the western hemisphere should bear his name. The name America was, therefore, first used in the book "Cosmographiae Introductio," by Martin Waldseemuller, professor of cosmography at the university.

It has since been shown that Vespucci was preceded by both Columbus and John Cabot, but it was too late. the new world had been christened America and the fact advertised in discipline, and nullifies his units as print. The house where the meeting was held at which the classical error was made was still standing at St. Die at the outbreak of the war, and was annually visited by many tourists from both North and South America.

POI HAWAIIAN NATIONAL DISH

is simply a game that must be begun is Being introduced into the United States and Is Said to Be Meeting With Favor.

Hawali is making a food-saving contribution in the shape of poi, its national dish made from the bulb of the taro plant. Until 20 years ago pol was made under primitive conditions, the bulbs being peeled, boiled and pounded in a wooden trencher until a semimain where we are and do not pass to liquid paste was formed. But today the offensive to fix the direction of at | modern sanitary machinery is used to manufacture the product, under supervision of health authorities in the island, and five factories at Hilo now turn out several tons daily.

This new form of poi is being sent to the United States, reaching markets as far away as New York city. and a demand which began with Hawailans who had come to the United States is generally being extended to Americans who have learned to like the dish.

Poi is frequently used in Hawalian hospitals in the diet of patients whose stomachs are too weak to digest other food, and the war interest in substitute foods is expected to lead to its wider introduction elsewhere.

No Lazy Man's Place.

and then listened to some folk talk kept carefully instructed to execute you may be under the Impression Hawaii is a land where Americans go and just naturally forget how to work, lie down beneath a shady, spready tree and listen to the thrum of the Hawaiian guitars until they're lulled into a sleep from which they seldom are aroused. "That stuff," said S. S. Payson of Honoluln "is all right, but it's for story books and comic operas. I went to Honolulu 13 years ago from Philadelphia, became president of the Rotary club, a member of the legislature and head of the largest automobile concern in Honolulu. When I came back to the United States I don't find any of my old companions are staying up any later at night than I do or travel faster than I do. Don't let any one put that 'go-to-sleep-and-never-wakeup' idea into your head. Hawaii is not a lazy man's ecuntry, by any means."

> Would Save Sea Loss. New York steamship underwriters

and government officials have authorized official tests of a new invention which, it is claimed by its designers, will save property valued at thousands of dollars in the event of the sinking of vessels. It is called a pneumatic safe and is said to float on the water, though of steel construction. It is as impervious to fire and theft as other safes. The device is said to weigh three tons. As evidence of his faith in the success of the invention the man who constructed it will lock himself inside when the safe is lowered overboard. In case the invention bears out what is claimed for it it will be adopted for use on American oceangoing ves-
